

2.G.A.2 Compare Fractions by Partitioning Rectangles

2.G.A.2: Partition a rectangle into rows and columns of same size squares (or rectangles) and count to find the total number of them.

Compare each set of fractions. Circle the greater fraction.

$$\frac{1}{3}$$

$$\frac{1}{6}$$

$$\frac{1}{5}$$

$$\frac{5}{10}$$

$$\frac{2}{4}$$

$$\frac{2}{3}$$

2.G.A.2 Compare Fractions by Partitioning Rectangles

Answer Key

2.G.A.2: Partition a rectangle into rows and columns of same size squares (or rectangles) and count to find the total number of them.

Compare each set of fractions. Circle the greater fraction.

$$\frac{1}{3}$$

$$\frac{1}{6}$$

$$\frac{1}{5}$$

$$\frac{5}{10}$$

$$\frac{2}{4}$$

$$\frac{2}{3}$$
