

2.G.A.2 Represent One-Eighth Using Partitioned Rectangles

2.G.A.2: Partition a rectangle into rows and columns of same size squares and count to find the total number of them.

Let's Do One-Eighth!

No. of shaded part: _____ Total # of parts: _____ Fraction: _____

No. of shaded part: _____ Total # of parts: _____ Fraction: _____

No. of shaded part: _____ Total # of parts: _____ Fraction: _____

No. of shaded part: _____ Total # of parts: _____ Fraction: _____

2.G.A.2 Represent One-Eighth Using Partitioned Rectangles

Answer Key

2.G.A.2: Partition a rectangle into rows and columns of same size squares and count to find the total number of them.

Let's Do One-Eighth!

No. of shaded part: 1

Total # of parts: 8

Fraction: $\frac{1}{8}$

No. of shaded part: 1

Total # of parts: 8

Fraction: $\frac{1}{8}$

No. of shaded part: 1

Total # of parts: 8

Fraction: $\frac{1}{8}$

No. of shaded part: 1

Total # of parts: 8

Fraction: $\frac{1}{8}$
