2.OA.A.1 Subtraction – Balancing Equations (Part 1)

2.OA.A.1: Use addition and subtraction within 100 to solve one- and two-step word problems

Write the number that makes each subtraction equation true.

$8 - \underline{\hspace{1cm}} = 4 - 3$	$3 - \underline{\hspace{1cm}} = 9 - 7$
$\underline{\hspace{1cm}} - 5 = 6 - 4$	$13 - 8 = \underline{\hspace{1cm}} - 4$
$5 - 1 = \underline{\hspace{1cm}} - 5$	$\underline{\hspace{1cm}} - 9 = 1 - 1$
$\underline{\hspace{1cm}} - 7 = 8 - 4$	$\underline{\hspace{1cm}} - 1 = 6 - 4$
$6 - 3 = \underline{\hspace{1cm}} - 5$	$10 - \underline{\hspace{1cm}} = 9 - 1$
$12 - \underline{\hspace{1cm}} = 4 - 2$	$11 - 9 = 9 - \underline{\hspace{1cm}}$
$17 - 8 = 12 - \underline{\hspace{1cm}}$	$9 - 4 = \underline{\hspace{1cm}} - 5$

Write the number that makes each subtraction equation true.

$8 - \underline{7} = 4 - 3$	$3 - \underline{1} = 9 - 7$
$\underline{7} - 5 = 6 - 4$	$13 - 8 = \underline{9} - 4$
$5 - 1 = \underline{9} - 5$	$\underline{9} - 9 = 1 - 1$
$\underline{11} - 7 = 8 - 4$	$\underline{3} - 1 = 6 - 4$
$6 - 3 = \underline{8} - 5$	$10 - \underline{2} = 9 - 1$
$12 - \underline{10} = 4 - 2$	$11 - 9 = 9 - \underline{7}$
$17 - 8 = 12 - \underline{3}$	$9 - 4 = \underline{10} - 5$
