2.OA.A.1 Subtraction – Balancing Equations (Part 2)

2.OA.A.1: Use addition and subtraction within 100 to solve one- and two-step word problems

Write the number that makes each subtraction equation true.

$8 - \underline{\hspace{1cm}} = 2 - 1$	$5 - \underline{\hspace{1cm}} = 6 - 2$
$\underline{\hspace{1cm}} - 7 = 8 - 4$	$2 - 2 = \underline{\hspace{1cm}} - 4$
$5 - 3 = \underline{\hspace{1cm}} - 5$	$\underline{\hspace{1cm}} - 9 = 14 - 8$
$\underline{\hspace{1cm}} - 8 = 9 - 5$	$\underline{\hspace{1cm}} - 1 = 9 - 4$
$11 - 3 = \underline{\hspace{1cm}} - 1$	$18 - \underline{\hspace{1cm}} = 10 - 1$
$7 - \underline{\hspace{1cm}} = 6 - 3$	$11 - 5 = 9 - \underline{\hspace{1cm}}$
$16 - 8 = 8 - \underline{\hspace{1cm}}$	$13 - 6 = \underline{\hspace{1cm}} - 2$

2.OA.A.1 Subtraction – Balancing Equations (Part 2)

2.OA.A.1: Use addition and subtraction within 100 to solve one- and two-step word problems

Write the number that makes each subtraction equation true.

$8 - \underline{\ 7\ } = 2 - 1$	$5 - \underline{\ 1\ } = 6 - 2$
$\underline{\ 11\ } - 7 = 8 - 4$	$2 - 2 = \underline{\ 4\ } - 4$
$5 - 3 = \underline{\ 7\ } - 5$	$\underline{\ 15\ } - 9 = 14 - 8$
$\underline{\ 12\ } - 8 = 9 - 5$	$\underline{\ 6\ } - 1 = 9 - 4$
$11 - 3 = \underline{\ 9\ } - 1$	$18 - \underline{\ 9\ } = 10 - 1$
$7 - \underline{\ 4\ } = 6 - 3$	$11 - 5 = 9 - \underline{\ 3\ }$
$16 - 8 = 8 - \underline{\ 0\ }$	$13 - 6 = \underline{\ 9\ } - 2$
