

### 3.NF.A.3 Coloring and Comparing Fractions

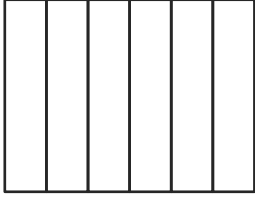

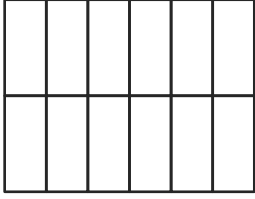

3.NF.A.3: Explain equivalence of fractions and compare fractions.

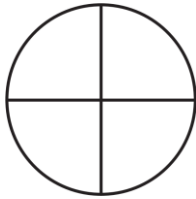

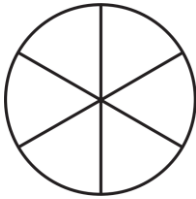

Color the shapes to show the given fractions, then compare them using  $>$ ,  $<$ , or  $=$  symbols.

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{1}{2}$		$\frac{2}{4}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{2}{3}$		$\frac{5}{6}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{3}{5}$		$\frac{1}{2}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{1}{6}$		$\frac{1}{12}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{2}{4}$		$\frac{3}{6}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{1}{4}$		$\frac{1}{2}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{5}{6}$		$\frac{3}{4}$

	<input style="width: 100%; height: 100%;" type="text"/>	
$\frac{3}{5}$		$\frac{6}{10}$

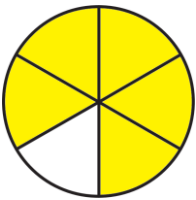

### 3.NF.A.3 Coloring and Comparing Fractions

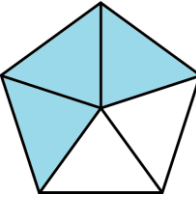

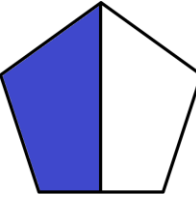

Answer Key

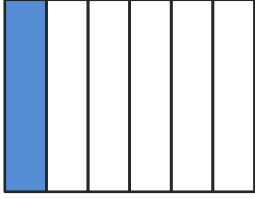

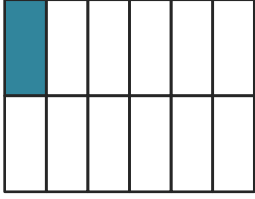

3.NF.A.3: Explain equivalence of fractions and compare fractions.

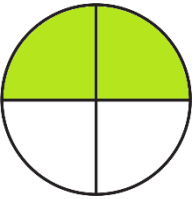

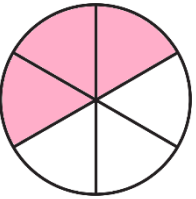

Color the shapes to show the given fractions, then compare them using >, <, or = symbols.

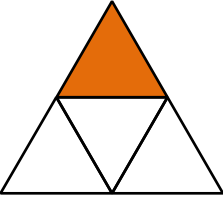

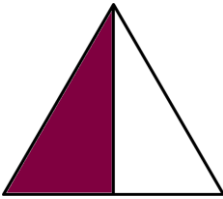

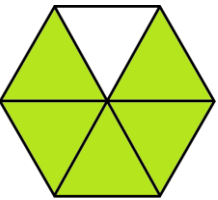

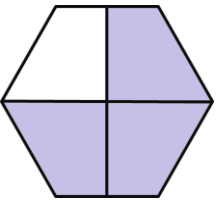

$$\frac{1}{2} = \frac{2}{4}$$

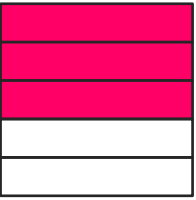

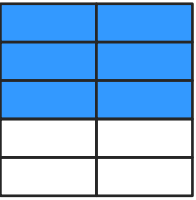

$$\frac{2}{3} < \frac{5}{6}$$

$$\frac{3}{5} > \frac{1}{2}$$

$$\frac{1}{6} > \frac{1}{12}$$

$$\frac{2}{4} = \frac{3}{6}$$

$$\frac{1}{4} < \frac{1}{2}$$

$$\frac{5}{6} > \frac{3}{4}$$

$$\frac{3}{5} = \frac{6}{10}$$
