

3.OA.C.7 Using Repeated Subtraction in Division

3.OA.C.7: Fluently multiply and divide within 100 using strategies.

Use repeated subtraction to solve the following division problems.

Division Problem	Repeated Subtraction	Answer
<p>Example:</p> $36 \div 12$	$36 - 12 = 24$ $24 - 12 = 12$ $12 - 12 = 0$	<p>3</p>
$55 \div 11$		
$18 \div 9$		
$40 \div 10$		
$24 \div 8$		
$28 \div 7$		
$45 \div 9$		

3.OA.C.7 Using Repeated Subtraction in Division

Answer Key

3.OA.C.7: Fluently multiply and divide within 100 using strategies.

Use repeated subtraction to solve the following division problems.

Division Problem	Repeated Subtraction	Answer
Example: $36 \div 12$	$36 - 12 = 24$ $24 - 12 = 12$ $12 - 12 = 0$	3
$55 \div 11$	$55 - 11 = 44$ $44 - 11 = 33$ $33 - 11 = 22$ $22 - 11 = 11$ $11 - 11 = 0$	5
$18 \div 9$	$18 - 9 = 9$ $9 - 9 = 0$	2
$40 \div 10$	$40 - 10 = 30$ $30 - 10 = 20$ $20 - 10 = 10$ $10 - 10 = 0$	4
$24 \div 8$	$24 - 8 = 16$ $16 - 8 = 8$ $8 - 8 = 0$	3
$28 \div 7$	$28 - 7 = 21$ $21 - 7 = 14$ $14 - 7 = 7$ $7 - 7 = 0$	4
$45 \div 9$	$45 - 9 = 36$ $36 - 9 = 27$ $27 - 9 = 18$ $18 - 9 = 9$ $9 - 9 = 0$	5
