

4.NBT.B.5 Multiply By 1-Digit Numbers Using Base-Ten Blocks

4.NBT.B.5 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers

- Write the multiplication expression. Use the given base-ten blocks to find the product. Regroup if needed.

Solution:

Solution:

- Draw a model with base-ten blocks to find the product.

$$3 \times 264$$

$$4 \times 420$$

4.NBT.B.5 Multiply By 1-Digit Numbers Using Base-Ten Blocks

Answer Key

4.NBT.B.5 Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers

- Write the multiplication expression. Use the given base-ten blocks to find the product. Regroup if needed.

Solution: $4 \times 446 = 1,784$

Solution: $5 \times 260 = 1,300$

- Draw a model with base-ten blocks to find the product.

$$3 \times 264 = 792$$

$$4 \times 420 = 1,680$$
