## 5.OA.B.3 Graph Relationships

5.OA.B. 3 Identify apparent relationships between corresponding terms.

1. The x coordinate of an ordered pair shows the number of hexagons. Y coordinate shows the number of vertices for the hexagons. If x is 3 , what is the y coordinate?
2. An ordered pair shows the relationship between number of parallelograms and the number of obtuse angles. If x is 4 , what is the value of y coordinate?

## Solution:

3. An orders pair shows the relationship between the number of heptagons and the number of sides. If $x$ is 5 , what is the $y$ coordinate?

## Solution:

## Solution:

$\qquad$
4. Write an ordered pair. Then, graph them on the given coordinate plane.

| No. of Men, x | 1 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| No. of Women, y | 0 | 2 | 3 | 4 |

| No. of Dogs, $x$ | 0 | 2 | 4 | 6 |
| :---: | :--- | :--- | :--- | :--- |
| No. of Cats, $y$ | 0 | 2 | 4 | 6 |

## Ordered pairs:

5. Use the line drawn on the coordinate plane on your left. Make a table of ordered pairs that are located on the line. Guess the equation that represents the line.

## Solution:

|  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |

Equation:

## 5.OA.B.3 Graph Relationships

## Answer Key

5.OA.B. 3 Identify apparent relationships between corresponding terms.

1. The $x$ coordinate of an ordered pair shows the number of hexagons. $Y$ coordinate shows the number of vertices for the hexagons. If $x$ is 3 ,

## Solution:

18 what is the y coordinate?
2. An ordered pair shows the relationship between number of parallelograms and the number of obtuse angles. If $x$ is 4 , what is the

## Solution:

8 value of y coordinate?
3. An orders pair shows the relationship between the number of heptagons and the number of sides. If $x$ is 5 , what is the $y$ coordinate?

## Solution:

4. Write an ordered pair. Then, graph them on the given coordinate plane.

| No. of Men, x | 1 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| No. of Women, y | 0 | 2 | 3 | 4 |

| No. of Dogs, x | 0 | 2 | 4 | 6 |
| :---: | :--- | :--- | :--- | :--- |
| No. of Cats, y | 0 | 2 | 4 | 6 |

| No. of Equilateral <br> Triangles, $x$ | 0 | 1 | 3 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| No. of Obtuse <br> Angles, $y$ | 0 | 0 | 0 | 0 |

Ordered pairs: $(1,0),(3,2),(4,3),(5,4) ;(0,0),(2,2),(4,4),(6,6) ;(0,0),(1,0),(3,0),(5,0)$

5. Use the line drawn on the coordinate plane on your left. Make a table of ordered pairs that are located on the line. Guess the equation that represents the line.

Solution:

| x | -1 | 0 | 1 | 2 | 3 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| y | -1 | 0 | 1 | 2 | 3 |

Equation: $y=x ; x=y$
