## Linear Relationship in the Form of an Equation

1. Write an equation which represents the rule: Divide by 20 and add 10 . Find the value of output $(\mathrm{y})$ for input $(\mathrm{x})=4,8$ and 10 .
2. Write an equation which represents the rule: Multiply by 3 and subtract 4 . Find the value of output $(y)$ for input $(x)=5,7$ and 9 .

## Solution:

## Solution:

1. Which of the following rules will always give the same output regardless of the input?
A. Multiply by 0 and add by 30
B. Divide by 4 and subtract 2
C. Multiply by 1 and add 50
D. None of these

Solution:
3. Find a rule. Complete the equation and the function table.

5. If $y=3 x-y$, which of these values can be true for $y$ :
A. 3
B. 0
C. -2
D. All of these
